Three Steps to Reading Success!

1. *Schedule a free consultation at Banyan Tree*
2. *Enroll before **May 1** for our 3-for-1 offer*
3. *Schedule a 2-hour session for 6-9 weeks during the summer*

If Your Child Needs

Fast ForWord[®]
by Scientific Learning

This summer is the time...using a New Model!

Fast ForWord Products are now available in TWO ways:

1. **TYPICALLY** parents purchase a single product license for each FF program needed for their child. For example, if the student enrolls in and completes FF Language, and then wants to enroll in FF Language to Reading, this would require purchasing 2 licenses from the company, Scientific Learning, through the provider. The program can be administered at home with parents monitoring, or at the approved provider site. This is the traditional method of delivering this intervention.
2. **NOW** certified providers may obtain a site license and multiple workstations, with the flexibility to move students through different products as they need them. *This feature is only available when students work at a provider site.* For example, if a student is working on FF Literacy at Banyan Tree, and finishes several games that were less challenging, but is still working on more difficult exercises, we have the flexibility to move the student to Literacy Advanced so the student will still be challenged.

Introductory Offer: **Fast ForWord Flexibility Program**

Parents who enroll students in Fast ForWord this summer will be offered an incredible opportunity! For the price of 1 Language or Literacy product license, students will have one year to complete 3 Fast ForWord programs. For example, if a student enrolls in Language, he will also be able to complete Language to Reading and Reading Level 1 before next summer. This can be done one right after the other, or spaced throughout the year so students have a break and allow time for the brain to process and reorganize after completing a set of exercises. **After this summer**, there will be an additional fee for any reading products following the language products.

Is Fast ForWord Right for my Child?

The research shows Fast ForWord can help with language, reading, phonemic awareness, attention and auditory processing. Call for a consultation, records review, and/or assessment to determine how Fast ForWord can help your child.

Summer Camp Enrollment

We offer a variety of intensive opportunities for your child to build *Skills for Success!* Our SummerCamps, which allow students to attend for 1, 2, 3, or 4 hours per day, are custom-designed for each child. The sessions can address math skills, reading/dyslexia, written language, study skills, and/or the foundational processing skills needed for efficient learning. Sessions are 3 weeks long, and we recommend at least two 3-week sessions to make significant gains. Sessions begin on June 16 and end on August 15. Special group study skills classes and writing classes will be scheduled the week of August 18-22.

Parents as Teachers

If you would like to learn how to help your child with reading, enroll in this class! While your child is participating in fun brain/body exercises, parents will attend ½ hour workshops, covering topics related to reading development and how you can help. You will then work with your child while still at Banyan Tree for 15 minutes, implementing skills just learned. Finally, you will de-brief with the instructor, sharing successes and clearing up questions. This is a perfect time to learn **how** to help your child with reading success. Call for times and fees.

Interactive Metronome has proven to be helpful for students with attention and learning challenges. This program can be a stand-alone program, or be integrated with other services and academic assistance. It can be customized for individual needs. Visit www.interactivemetronome.com for information on this exciting and fun intervention. Sign up now for summer!

If your child or student is having difficulty learning in one of the following ways:

- paying attention
- learning to read or spell (struggles to sound out words)
- slow with math facts
- does not complete assignments
- memory
- comprehending or understanding
- working too hard for what is achieved

Consider PACE and Master the Code!
